<https://github.com/msg2santoshsagar/> Chennai India

SUMMARY

Full Stack Software Engineer with 8+ years of experience in designing and developing scalable applications using modern frontend and backend technologies.

- Extensive experience in application development following **Agile and Waterfall** methodologies.
- Expertise in the **full software development lifecycle (SDLC)**, from requirements analysis to design, coding, testing, debugging, deployment, and integration.
- Strong proficiency in **Core Java, J2EE, Spring Boot, Spring JPA, Hibernate, Angular, React, JavaScript, and Python**.
- Hands-on experience in **end-to-end application development**, including microservices and RESTful APIs.
- Proficient in **version control and configuration management** using Git.
- Proven track record of delivering high-quality software **on time and within scope**.
- Excellent **problem-solving, analytical, and technical communication** skills, with a strong ability to collaborate across teams.

EXPERIENCE

Technical Lead

KLA-Tencor Software 12/2020 - Present Chennai, India

- Designed and developed **scalable full-stack solutions**, handling both frontend (Angular) and backend (Spring Boot, Python).
- Acted as a **go-to person** for both feature development and issue resolution, ensuring smooth project execution.
- Engaged directly with **customers and stakeholders** to understand their pain points and delivered effective solutions.
- Worked on **feature enhancements, bug fixes**, and performance optimizations to improve system stability.
- Delivered **high-quality, well-tested software** adhering to best practices and coding standards.
- Helped team members by **mentoring and resolving technical queries**, fostering collaboration and improving overall efficiency.
- Played an active role in **deployments and containerization** using Docker and Kubernetes.
- Contributed to **continuous improvement initiatives**, driving innovation and best practices in development.

Full Stack Developer

Mr. Cooper 12/2018 - 12/2020 Chennai, India

- Led the development** of key modules using **Java 8, Spring Boot, React, and Node.js**, improving system performance and maintainability.
- Designed and implemented **multiple microservices**, optimizing inter-service communication and scalability.
- Followed **Test-Driven Development (TDD)** to ensure high code quality and reduce production defects.
- Developed reusable **React.js components**, improving UI consistency and reducing development time.
- Optimized **MongoDB queries**, leading to a **30% improvement in database performance**.
- Mentored** junior developers, resolving technical challenges and improving team productivity.
- Collaborated with cross-functional teams to implement best practices for **CI/CD, code reviews, and version control**.

KEY ACHIEVEMENTS

Workplace Excellence

Awarded **On The Spot Award** for quickly learning project requirements and becoming a **key contributor** to the **Next Generation Portal Project** in Pune during challenging times.

Received **multiple appreciations from leads & clients** for delivering high-quality products on time.

Hackathon Achievements

2nd Place in Slam Dunk Digital Hackathon (Feb 2018) – Organized by TCS Talent Development.

12th Place in Slam Dunk Digital Hackathon (Jan 2018) – Received the **Innovation Pride Award** for innovative solutions.

First Runner-Up in Codu Challenge (Codeathon) (March 2017) – Organized by TCS Retail Talent Development.

8th Place in Code Run Retail Hackathon (Feb 2017) – Received the **Special Initiative Award** for exceptional performance.

Learning & Innovation Awards

Honored with **Learning Achievement Awards** in recognition of **outstanding learning efforts** and technical excellence.

Developed reusable components and optimized code, leading to performance improvements and recognition from leadership.

Continuous Impact & Recognition

Acknowledged for **mentoring and helping team members**, enhancing productivity and fostering technical growth.

Actively contributed to **innovation-driven initiatives**, helping teams adopt best practices in full-stack development.

SKILLS

Java/J2EE, JavaScript, Python, Node.js

SQL, Oracle, MongoDB, PostgreSQL

EXPERIENCE

Full Stack Developer

[Tata Consultancy Services](#) 📅 08/2016 - 12/2018 📍 Chennai, India

- **Re-engineered legacy web applications**, transforming them into RESTful services for mobile consumption using **Spring Boot and AngularJS**.
- Designed and developed well-structured **REST APIs**, enabling seamless integration with mobile applications.
- Followed **Test-Driven Development (TDD)** to improve code quality and reduce production defects.
- Developed reusable artifacts, reducing manual effort and improving development efficiency.
- **Optimized database queries**, improving application performance and reducing response time.
- **Implemented Google Analytics** to track user activity and improve user engagement.
- Automated **CSS and JavaScript minification** using **Gulp**, enhancing application load speed.
- Used **JHipster framework** for rapid application development, ensuring faster project delivery.
- **Mentored junior developers** and shared best practices, improving overall team efficiency.

SKILLS

JHipster, Spring Boot, Spring JPA, Spring Security, jQuery, AngularJS, React, Node.js

HTML5, CSS3, XML, JSON

EDUCATION

Bachelor of Technology in Computer Science and Engineering

[Maulana Abul Kalam Azad University of Technology, West Bengal](#)

📅 2012 - 2016 📍 Kolkata, India
